**3. Product Information:**

|                                 |                                       |
|---------------------------------|---------------------------------------|
| Description:                    | Industrial Liquid Funnel              |
| Material of Construction:       | 304 Stainless Steel                   |
| Top Diameter:                   | 200mm                                 |
| Outer Diameter of Spout:        | 20mm                                  |
| Overall Length:                 | 205mm                                 |
| Nominal Spout Length:           | 88mm                                  |
| Nominal Weight:                 | 245g                                  |
| Side Handle:                    | Spot welded to cone section of funnel |
| Recommended Storage Conditions: | Dry and ambient temperature           |

Note: Due to the manufacturing method there is an internal crevice where the cone and spout are joined. These funnels are primarily designed for industrial applications.
